SUMMARY

Business Analyst with 3+ years turning complex business problems into structured, data-backed decisions that stakeholders can act on. Backed by an M.Sc. in Data Science, skilled in requirements engineering, process analysis, and cross-functional alignment — with SQL, Python, and Power BI to analyse, model, and communicate findings that drive decisions. Experienced across Oracle Fusion environments in Finance and Supply Chain (SCM), with AI-assisted analytics applied where it drives real decision value. Based in Berlin, German B1 advancing to B2.

EXPERIENCE

Independent Consultant – Business & AI Strategy

Self-employed

Sep 2025 – Present | Berlin, DE

- Facilitated requirements workshops and AS-IS process mapping with SME clients in logistics and finance, consistently scoping vague digital transformation briefs into 2–3 prioritised, actionable opportunities using structured decision frameworks.
- Designed a build-vs-buy evaluation framework for a forecasting use case; delivered a logistics cost dashboard eliminating weekly manual reporting and preventing unnecessary development spend.
- Conducted variance and root cause analysis for a finance client, restructuring their exception-tracking process and cutting review meetings from 3 to 1 — freeing capacity for higher-value work.

Thesis: XAI Stock Prediction Dashboard

University of Europe for Applied Sciences

Sep 2024 – Feb 2025 | Berlin, DE

- Built an end-to-end explainable AI system using an LSTM neural network and SHAP DeepExplainer that forecasts stock price movements and explains each prediction in plain visual terms designed, so non-technical stakeholders could understand and act on the outputs rather than just trust a black box.
- Prioritised explainability as a core business requirement — surfacing three layers of SHAP-based reasoning per prediction (global feature importance, per-instance waterfall, heatmap) so decision-makers could know when to trust the model and when to question it, not just accept its output.
- Deployed as a configurable Streamlit app with a rigorous 70/15/15 chronological train-val-test split and test-set-only RMSE/MAE evaluation — ensuring results were reproducible and honest across different stocks and time periods, not just optimised on training data.

Associate Consultant – Functional Business Analyst

CES Ltd (NTT Global)

Mar 2022 – Mar 2024 | IND

- Automated Oracle Fusion Cloud (R13) data extraction across AR, AP, and FA modules, consolidating 15 siloed Excel files into 3 executive dashboards and cutting reporting turnaround by 20%.
- Standardised 12 core metrics across Finance and IT reporting by authoring functional specifications that resolved conflicting definitions across teams, ending recurring reconciliation disputes.
- Diagnosed 18% Q2 cost overrun as a timing artefact from delayed Q1 invoices, presented root cause findings to senior management, preventing a misattributed budget breach and enabling accurate reforecasting.
- Tracked requirements and sprint tasks in JIRA across 3 Agile delivery cycles and led UAT sign-off, ensuring zero post-deployment data discrepancies across reporting go-lives.

Trainee – Functional Business Analyst

CES Ltd (Herber Aircraft Services)

Jun 2021 – Mar 2022 | IND

- Supported Oracle E-Business Suite (EBS) and Fusion Cloud rollout — built SQL validation scripts catching configuration errors pre-deployment, reducing post-go-live failures by 10%, and produced process documentation adopted into monthly planning cycles across business units.

Early Growth Intern – Strategy & Operations

XPRS Techno Logistics

Jul 2020 – Mar 2021 | IND

- Built a cross-functional performance tracker linking marketing spend, sign-ups, and delivery cost; analysis across marketing, sales, and operations directly informed two new market launch decisions.

EDUCATION

M.Sc. Data Science UE for Applied Sciences

Oct 2023 – Jun 2025
Berlin, Germany

B.Tech.

Information Technology Sreenidhi IST, India

Jun 2016 – Sep 2020
Hyderabad, India

SKILLS

Business Analysis

Requirements Engineering · Functional Specifications · Workshop Facilitation · Process Optimisation · Stakeholder Alignment · Build-vs-Buy Evaluation · Business Case Development · AS-IS/TO-BE Mapping · BPMN

Decision & Analytics

KPI Design · Variance Analysis · Root Cause Analysis · Scenario Analysis · Data-to-Business Translation · UAT Support · Executive Reporting

Agile & Methods

Agile · Scrum · Sprint Planning · User Stories · JIRA · Confluence

Tools & Reporting

Power BI · Tableau · Excel · Oracle Fusion · Oracle EBS · Streamlit · n8n · Git · Jupyter · VS Code

Data & AI

Python (Pandas, NumPy, scikit-learn) · SQL · Explainable AI (SHAP) · LangChain · Retrieval-Augmented Generation (RAG) · Time Series Forecasting · Predictive Modelling · Prompt Engineering

LANGUAGES

English

Fluent

German

Intermediate (B1→B2)

Hindi
