PROFILE

Analyst who gets things moving. Comfortable leading discovery sessions, structuring messy problems, and turning data into decisions that land. Background spans strategy, reporting, and process work across finance, logistics, and tech. Completed an M.Sc. in Data Science in Berlin in 2025 and have been building independently since. Based in Berlin, German B1 advancing to B2.

EXPERIENCE

Associate Consultant — Business Analyst

Mar 2022 — Mar 2024

CES Ltd, embedded with NTT Global · India

- Pulled 15 siloed Excel reports and rebuilt them as 3 Power BI executive dashboards across Finance, Procurement and Supply Chain, standardising 12 KPIs and cutting reporting turnaround by 20%.
- Caught an 18% Q2 cost overrun in Oracle Fusion that traced back to delayed Q1 invoice timing, not actual overspend, preventing a wrong budget decision and enabling accurate reforecasting before the cycle closed.
- Wrote functional specifications in Confluence that resolved a 6-month-old definitional conflict between Finance and IT over the same 4 metrics, ending 3 cycles of reconciliation disputes.
- Owned UAT sign-off across 3 delivery cycles in JIRA, writing test cases in HP ALM, closing all critical defects before each release, and achieving zero data discrepancies across all reporting go-lives.

Independent Business Analyst

Sep 2025 — Present

Freelance Project Work — Remote, clients outside EU · Berlin, DE

- Built a client operations system for a travel SME using Google Sheets, Excel, Google Apps Script and Zapier, automating intake, document generation, billing and email dispatch, reducing weekly admin time by around 60% and eliminating recurring data entry errors.
- Delivered a Power BI cost-tracking dashboard for a logistics client after running a 3-option build-vs-buy evaluation in Excel, eliminating manual weekly reporting. Separately built a structured product organisation interface in Excel and Google Sheets for a pharma client, consolidating scattered records and reducing weekly review time.

M.Sc. Thesis — AI-Powered Financial Decision Dashboard

Sep 2024 — Feb 2025

University of Europe for Applied Sciences · Berlin, DE

- Built a stock forecasting system in Python using an LSTM model trained on 5 years of price and volume data, achieving 70%+ directional accuracy on held-out test periods with a strict chronological train-val-test split.
- Layered three SHAP explainability views per forecast (global importance, per-prediction waterfall, time-series heatmap) and deployed the full system as a live Streamlit app, making every output interrogable by non-technical stakeholders.

Trainee Business Analyst

Jun 2021 — Mar 2022

CES Ltd — Herber Aircraft Services · India

- Wrote SQL validation scripts for the Oracle EBS and Fusion Procurement rollout, caught configuration errors pre-deployment and reduced post-go-live failures by 10%.
- Built UAT test scripts in HP ALM across two ERP modules, logged defects in JIRA through to resolution, and contributed to on-time functional sign-off for both releases.

Growth & Analytics Intern

Jul 2020 — Mar 2021

XPRS Techno Logistics · India

- Built the company's first ROI tracker across 4 channels in Excel and Google Sheets, giving the founding team their first data-backed view of spend efficiency and cost per acquisition.
- Cross-functional analysis in Google Analytics surfaced demand signals that triggered two city launches worth Rs. 2Cr+ in projected revenue.

SKILLS

Business & Strategy Requirements Engineering · KPI Design · Variance Analysis · Root Cause Analysis · Stakeholder Management · Process Mapping (BPMN) · Workshop Facilitation · Business Case Development · Build-vs-Buy Evaluation · UAT

Data Analytics & Reporting Power BI · SQL · Excel (Advanced) · Tableau · Snowflake · Data Modelling · Dashboard Design · Scenario Analysis · A/B Testing · Market Research · Competitive Analysis

Tools & Delivery Oracle Fusion R12/R13 · Oracle EBS Suite · JIRA · Confluence · Agile/Scrum · Google Apps Script · Zapier · Streamlit · Python (Pandas, NumPy) · Git · HP ALM

EDUCATION

M.Sc. Data Science — Grade: gut (2.0) Oct 2023 — Jun 2025
University of Europe for Applied Sciences, Berlin
Data Engineering 100 · Decision Support Systems 100 · Cloud Computing 98

B.Tech. Information Technology — First Class Jun 2016 — Sep 2020
Sreenidhi Institute of Science & Technology, India
